Posterior Predictive Check
Model−predicted lines should resemble observed data

Density

item_test_NABS

— Model−predicted data — Observed data

Linearity
Reference line should be flat and horizontal

Residuals

Fitted values

Homogeneity of Variance
Reference line should be flat and horizontal

√|Std. residuals|

Fitted values
Influential Observations
Points should be inside the contour lines

Std. Residuals

161 175 50 5
153 86
7

Leverage (h_{ii})
Normality of Residuals
Dots should fall along the line

Sample Quantiles

Standard Normal Distribution Quantiles
